

# Hope Village – Guest Accommodations

## CONCEPT

The blue boxes above provide a concept plan for guest accommodations in Hope Village. We propose that these accommodations consist of three Villas each designed to accommodate a family, three Cottages for one or two guests each, and two Buildings that each accommodate 5 guests in individual rooms with direct access to the grounds. We will provide in each configuration at least one ADA compliant room.

# Building #1

These are accessible apartments with a single bed. Each apartment is 14' 6" x 20' 5" and 250 SF

Building exterior architecture can be as desired. We can do a faux dormer over each one to provide a townhome-like appearance. We show double walls to obtain necessary fire separation.
